

Dipen Bambhaniya

Lead Software Engineer

Python · Node.js · AWS · Microservices · Payments · Distributed Systems

Bengaluru, India work.dipen@gmail.com +91 88888 26142 in/dipen-bambhaniya

Lead Software Engineer with over a decade of experience architecting backend systems that handle payments, inventory, and real-time commerce at scale.

SKILLS & TOOLING

Languages

Python · JavaScript · TypeScript · Java · PHP · SQL · No-SQL

Cloud & Infrastructure

AWS · AWS Lambda · EC2 · S3 · SQS · DynamoDB · Google Cloud · Docker

Data Stores

PostgreSQL · MySQL · MongoDB · Cassandra · Redis · Elasticsearch

Backend & Frameworks

Django · FastAPI · NestJS · Node.js · REST APIs · Microservices

Messaging & Real-time

Kafka · RabbitMQ · MQTT · Event-Driven Architecture

Integrations & Tooling

Avalara · Meta Marketing API · Spreadly · Tipalti · HubSpot · AfterShip · Twilio · SendGrid · FCM · Tally · Jupyter · Git

EXPERIENCE

Appscrip

Jul 2016 — Present · Bengaluru, India

Truly-Free trulyfree.com ↗
MAY 2023 — PRESENT · REMOTE

- Architected and maintained scalable backend microservices for Payments, Inventory, Products, Livestream, Affiliate, and Meta Audience Sync using Python (Django, FastAPI), NestJS, and Kafka, on MongoDB, Cassandra, Redis, and MySQL.
- Built the Payments service on Spreadly for card tokenization and gateway processing, with Avalara integrated for real-time US sales-tax calculation across jurisdictions.
- Own the Social service (social-v1) end to end — posts, offers, and product+post collections — and am now leading its migration to social-v2 with major architectural changes.
- Built Reviews & Ratings (bulk import and single-user submission flows), buyer-to-seller Q&A, and product FAQ services to support the storefront.

Klub Works klub.ai ↗
APR 2022 — APR 2023 · REMOTE

- Built backend services for brand and store onboarding — signup and application flows for requesting revenue-based financing — using NestJS and PostgreSQL.
- Integrated a partner Bank API to retrieve applicant bank details, implemented as an AWS Lambda function, to power the underwriting flow.
- Designed and implemented REST APIs and backend workflows for seamless frontend integration, while collaborating with cross-functional teams to deliver scalable and production-ready solutions in an Agile environment.

Byju's byjus.com ↗
NOV 2021 — APR 2022 · REMOTE

- Developed and maintained scalable backend systems using Node.js, Python, and Kafka, ensuring reliable service communication and high system availability.
- Improved backend performance and system efficiency through optimization, debugging, and performance tuning across distributed services.
- Mentored new team members on Node.js, MongoDB, and backend development best practices while collaborating with cross-functional teams to deliver projects successfully in an Agile environment.

Appscrip In-House Products appscrip.com ↗
JUL 2016 — 2021 · ON-SITE

- Developed and maintained scalable social platform products — WhatsApp, TikTok, Instagram, and Tinder style applications — covering real-time chat and calling, short-video feeds, and photo/reel sharing, using Node.js with MQTT for real-time messaging.
- Built reusable libraries and shared backend modules — chat delivery, presence, and media pipelines — to accelerate development, improve code reusability, and reduce overall engineering effort across multiple projects.
- Contributed to successful product development for platforms like Sales-Paddock and 24 Messenger while collaborating with cross-functional teams in an Agile environment to deliver projects on time.

Amardeep Logistics Pvt. Ltd.

Jun 2015 — Jun 2016 · Gujarat, India

Software Developer — Logistics Management System

Logistics Management System
JUN 2015 — JUN 2016 · ON-SITE

- Designed and developed a complete desktop-based Logistics Management System from scratch using Java and MySQL to streamline shipment tracking, billing, inventory, and operational workflows.
- Built and maintained core business modules including order management, customer handling, invoice generation, reporting, and inventory tracking to improve operational efficiency.
- Added Excel export and data export to Tally accounting software, and built an in-house accounting module for ledgers, invoicing, and financial reporting.
- Implemented automated email and SMS notifications to customers and clients for container status and payment updates.

EDUCATION

M.Sc. in Information Technology

SRK Institute of Management & Computer Education · Anjar, Kutch · CGPA 8.05/10 · Grade A+

2013 — May 2015

Bachelor of Computer Applications (BCA)

SRK Institute of Management & Computer Education · Anjar, Kutch · Grade A+

2011 — 2013
