Skills

Languages: Python, JavaScript, TypeScript, SQL, No-SQL

Technologies & Tools: AWS, EC2, DynamoDB, S3, SQS, Google Cloud, Elasticsearch, Docker, Kafka, RabbitMQ, MQTT, Socket.io, Redis, Twilio, SendGrid, jupyter

Work Experience

Appscrip, Bangalore

Jul 2016 - Present

Project - Truly-Free - trulyfree.com (Remote) May 2023 - Present

- Architected and maintained scalable backend microservices for Payments, Inventory, Products, Livestream, Affiliate, and Meta Audience Sync using Python (Django, Fast API), Nest JS, and Kafka.
- Built high-performance distributed systems using MongoDB, Cassandra, Redis, and MySQL, improving API responsiveness, scalability, and real-time data processing.
- Led backend technical initiatives including third-party integrations (Avalara, Meta), event-driven architecture, production optimization, and cross-team system design collaboration.

Project - Klub-works - klub.ai (Remote) Apr 2022 - Apr 2023

- Developed and maintained scalable backend applications for Klub using NestJS and PostgreSQL, enabling reliable and high-performance business operations across multiple services.
- Designed and implemented REST APIs and backend workflows for seamless frontend integration, while collaborating with cross-functional teams to deliver scalable and production-ready solutions in an Agile environment.
- TypeScript, Nest-JS, PostgreSQL, REST APIs, Agile, Backend Architecture, API Development, Debugging, Testing, Git, Microservices.

Project - Byju's - byjus.com (Remote) Nov 2021 - Apr 2022

- Developed and maintained scalable backend systems using Node.js, Python, and Kafka, ensuring reliable service communication and high system availability.
- Improved backend performance and system efficiency through optimization, debugging, and performance tuning across distributed services.
- Mentored new team members on Node.js, MongoDB, and backend development best practices while collaborating with cross-functional teams to deliver projects successfully in an Agile environment.

AppScrip - In House project - on-Site Jul 2016 - 2021

- Developed and maintained scalable social media platform clones including WhatsApp, TikTok, Instagram, and Tinder using Node.js and modern backend technologies, focusing on real-time communication and high-performance APIs.
- Built reusable libraries and shared backend modules to accelerate development, improve code reusability, and reduce overall engineering effort across multiple projects.
- Contributed to successful product development for platforms like Sales-Paddock and 24 Messenger while collaborating with cross-functional teams in an Agile environment to deliver projects on time.

Amardeep Logistics Pvt. Ltd

Software Developer – Logistics Management System

Jun 2015 - Jun 2016

- Designed and developed a complete desktop-based Logistics Management System from scratch using Java and MySQL to streamline shipment tracking, billing, inventory, and operational workflows.
- Built and maintained core business modules including order management, customer handling, invoice generation, reporting, and inventory tracking to improve operational efficiency.
- Designed optimized MySQL database schemas and implemented backend business logic in Java to ensure reliable performance, data consistency, and scalable application architecture.
- Collaborated directly with business stakeholders to gather requirements, customize workflows, troubleshoot production issues, and deliver production-ready solutions within project timelines.

Education

SRK Institute of Management and Computer Education - Kutch

2013 - May 2015

M.Sc. in Information Technology (MSC IT)

CGPA: 8.05/10

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Web Technologies, Cloud Computing, Machine Learning, Distributed Systems, Object-Oriented Programming, Data Mining.
